Subject: Wilcox Deed Map

Lance,

I've attached a map of the boundaries we've created so far with owner & date information.

The only ones left are those I mentioned to you yesterday referencing the Town of Bristow and the Town of Drumright plat maps. There are also 3 different areas north/northwest of Bristow that were pump stations. Their descriptions are just 1-5 acres somewhere within 160 acre quarter section. I can create maps of these only by outlining the quarter section, but there's no way to identify the exact 5 acre plot of land. Let me know if you would like to see these and I can create a quick map.

There are also some descriptions in Seminole County. It appears to be an incomplete list that may have been photocopied by accident. If you would like to see these I can create a quick map as well.

Let me know if you have any questions or would like a paper copy of the map.

Jeff
